SUMMARY

Computer Science student at BINUS University with a strong academic record (GPA 3.48/4.00) and a passion for Software Engineering, Full Stack, and Data Analytics. Experienced in research, teaching, and organizational leadership. Collaborative and open-minded professional enthusiastic about mastering new technologies and refining technical, problem-solving, and communication skills

EDUCATION

BINUS University *2024 - Present*
Computer Science Undergraduate *GPA 3.48/4.00*
Relevant coursework: Artificial Intelligence, Algorithm and Programming, Web Programming, Big Data Analysis, Software Engineering

SMA Negeri 1 Lawang *2021-2024*
Natural Science Major

PROJECT

ScholarPath - Frontend Developer

- Developed the frontend interface for a centralized scholarship and academic competition platform to solve information fragmentation and exclusivity.
- Integrated a multi-technology stack including Vue.js, Laravel, Go, PostgreSQL, and Python to deliver a responsive user experience.
- Implemented personalized AI-driven filtering mechanisms to match high-potential students with relevant educational funding opportunities

HealthyBuddy - Frontend Developer

- Engineered a web-based basic health screening and monitoring platform utilizing Java and the Spring Boot framework.
- Built core health analysis features, including BMI calculation, blood pressure evaluation, and historical tracking dashboards with interactive visual comparison charts.
- Configured relational database mapping with JPA/Hibernate to securely manage user authentication and health history records.

Embun Management System - Frontend Developer

- Developed a centralized, web-based operational management platform for a Food & Beverage establishment using the Agile Scrum methodology.
- Implemented a comprehensive Role-Based Access Control (RBAC) architecture and dynamic React.js frontend integrated with a RESTful Laravel backend.
- Engineered automated features including real-time inventory deduction, digital table reservations, and financial report generation to streamline business operations.

TEACHING EXPERIENCE

Teaching Assistant – *Computational Physics, Database Technology, Computer Network* *Sept 2026 - Present*

- Instructed and managed 6 laboratory classes, effectively delivering complex technical curriculum across three different computing disciplines to approximately 110 third-semester students.
- Delivered comprehensive laboratory materials on computational methods and physics simulations alongside a co-instructor
- Evaluated student lab submissions, ensuring the accuracy of algorithmic implementations for physics, database, and network problems

Teaching Assistant – *Data Structures* *Feb – May 2026*

- Co-instructed 5 weekly laboratory classes with co-intructor, providing hands-on guidance and practical instruction in advanced data structure implementation to a cohort of 85 second-semester students.
- Prepared and assessed programming tasks and structured exercises.
- Mentored students outside scheduled hours to reinforce conceptual understanding and debugging skills.

Teaching Assistant – *Human-Computer Interaction* *Feb – May 2026*

- Assisted the course lecturer in facilitating an interactive laboratory class for 24 students, successfully guiding them through the practical application of usability principles and user-centered design.
- Guided students in interface evaluation, prototyping, and user testing activities.
- Reviewed and provided feedback on design assignments and usability reports.

ORGANIZATION EXPERIENCE

Himpunan Mahasiswa Teknik Informatika (HIMTI)

Vice Manager of Academic Event Commission - HIMTI @Malang *Feb 2026 - Present*

- Co-led the planning and execution of academic programs, workshops, and educational events to enhance student competencies.
- Supervised division staff and coordinated event operations to ensure seamless workflow across all timelines.
- Collaborated with internal divisions and academic stakeholders to align event objectives and deliver impactful sessions.

Staff Marketing and Publication - HIMTI @Malang *Jan 2025 - Jan 2026*

- Contributed to the development and execution of promotional strategies for organizational programs and events.
- Designed and managed publication materials across digital platforms to increase engagement and visibility.
- Collaborated with internal divisions to ensure consistent branding and effective communication.

UKM Basket

Staff Workforce Management *2024 - 2025*

- Managed scheduling, attendance tracking, and resource allocation for club members and internal operations.
- Coordinated staff assignments and duty rosters for campus basketball events, training sessions, and sports tournaments.
- Streamlined internal communication and workflow efficiency among team members to support smooth organizational activities.

EVENT EXPERIENCE

Binus University

Freshmen Partner - *Student Mentorship Program* *Sept 2025 - May 2026*

- Successfully mentored and provided continuous support to a cohort of 35 new students throughout their entire first academic year, significantly easing their transition into university life.
- Provided academic guidance, shared campus resources, and assisted with personal and organizational adjustment.

Freshmen Leader - *Student Orientation Program* *Aug - Sept 2025*

- Accompanied and mentored new students during the university orientation program.Acted as the primary leader and mentor for 35 incoming freshmen during the intensive First Year Program orientation.
- Facilitated group activities, provided academic guidance, and helped freshmen adapt to campus life.
- Served as a liaison between new students and organizing committee to ensure smooth communication.

Luminova - *Equipment Division Coordinator* *May - July 2025*

- Collaborated with the Informatics Engineering and Entrepreneurship Student Associations to organize a community service project.
- Instructed high school students on the intersection of business and technology, providing hands-on learning in digital entrepreneurship.
- Developed educational modules aimed at bridging the gap between secondary education and current industry trends in tech-business.

Company Visit - *Equipment Division* *May - July 2025*

- Spearheaded the end-to-end logistical and equipment preparations for a professional Company Visit, effectively facilitating a seamless event experience for 40 participants and a 13-member committee.
- Ensured zero technical disruptions by proactively setting up and managing essential audiovisual and physical assets, directly contributing to an engaging and uninterrupted learning environment for the attendees.
- Optimized resource allocation and collaborated closely with cross-functional committee members, establishing a highly organized operational workflow that guaranteed the overall success of the event.

NBA 2K Tournament - *Project Leader* *April - May 2025*

- Organized and managed a competitive NBA 2K25 e-sports tournament featuring 16 participants.
- Handled end-to-end event logistics, including participant registration, bracket scheduling, and technical setup.
- Ensured fair play and high engagement throughout the competition to promote the sports community on campus.

EXPERTISE & LANGUAGE

Techincal Skills:

- Programming : C, JavaScript, Python, TypeScript
- Web Development : React, Next.js, Tailwind, HTML, CSS, Golang, Laravel
- Tools : Git, MySQL, SQLite

Languages:

- Indonesia (Native)
- English (Proficient)
